

Achieving Better Care by Monitoring All Prescriptions (ABC-MAP)

Act 191 of 2014

ABC-MAP Board Meeting
April 16, 2019

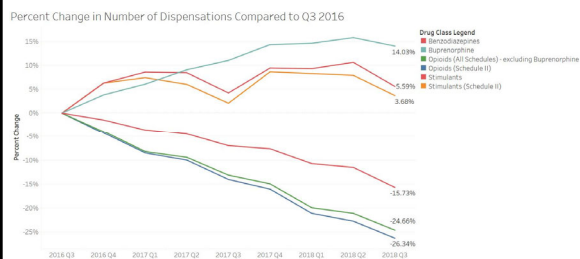

Agenda

- New Business
 - Updates on initiatives
 - Enhanced overdose death data review
- Adjournment

Data from PDMP

Prescriber Education Initiative

- [Evidence-Based Prescribing: Tools You Can Use to Fight the Opioid Epidemic](#)
 - Over 2,000 health care professionals educated on-site through a face-to-face education session.
 - Includes participants working in 24 counties out of 67 PA counties.
 - Over 3,200 health care professionals completed online courses through TRAIN PA.
 - Includes participants working in 60 counties out of 67 PA counties, 45 states and 9 countries.

Prescriber Education Initiative

Progress

- Partnered with 3 academic medical institutions that are currently providing face-to-face training using evidence-based prescribing modules until August 31, 2019.
 - University of Pennsylvania
 - Penn State University
 - University of Pittsburgh
- Evaluation is in progress.
 - Includes analysis of PDMP system data as well as pre- and post-education evaluation surveys to determine the effectiveness of this initiative.

Patient Advocate Program

- Patient Advocate Program (PAP) would coordinate health care resources for patients who have abruptly lost access to their provider due to a variety of factors, such as illegal or irresponsible prescribing practices, retirement, or relocation.

Progress

- Met with several state agencies to understand the current state of how patient complaints are handled.
- Reached out to Maryland and Washington to understand their patient advocacy programs.
- PDMP is in the process of creating a workflow and action plan.
- Gain consensus from the Unified Opioid Command Center and state agencies involved in the action plan.
- Additional legal and communication clarifications are in discussion.

EHR and Pharmacy System Integration

Progress

Status	Count	Approx. Count of providers / stores
*Application received	556	9,837
In Process	150	12,178
In Production	201	42,407
On hold	128	1,153
Grand Total	924	65,575

- Currently, 150 integrations are in process, and 9 of them are health systems:

- Albert Einstein Healthcare Network
- Commonwealth Health
- Encompass Health
- Excelsa Health
- Grand View Health
- Heritage Valley Health System
- Penn Highlands Healthcare
- St. Luke's University Health Network
- VA Stars & Stripes Healthcare Network (VHA)

*Health care entities are completing the prerequisites for integration approval.

EHR and Pharmacy System Integration

Progress of integrations completed

Business type	Count of business type	Count of providers/stores
Private practice	121	1,731
Pharmacy	54	246
Health system	17	34,987
Independent hospital	9	5,443
Grand Total	201	42,407

Highlights:

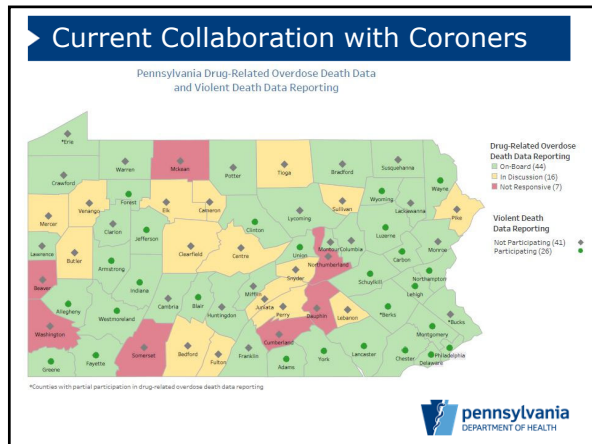

- Summit Health System – 02/22/2019
- Holy Redeemer Hospital – 03/06/2019
- Penn State Hershey Health System – 03/11/2019
- Main Line Health System – 03/11/2019
- WellSpan Health – 03/19/2019

Overdose Surveillance – ED

- Syndromic Surveillance data collected by EpiCenter from 167 out of 172 Emergency Departments in PA.
- Weekly Reporting to the Unified Opioid Command Center
- EpiCenter Alerts
 - Alerts are generated when incidents of opioid or heroin related overdoses are reported in the ED's surpass the thresholds established by region.
 - Since August 2018, 29 alerts have been sent out.
 - Unified Opioid Command Center disseminates these alerts out for hands-on prevention and intervention efforts from state agencies.
 - Feedback on alerts is captured through a survey.

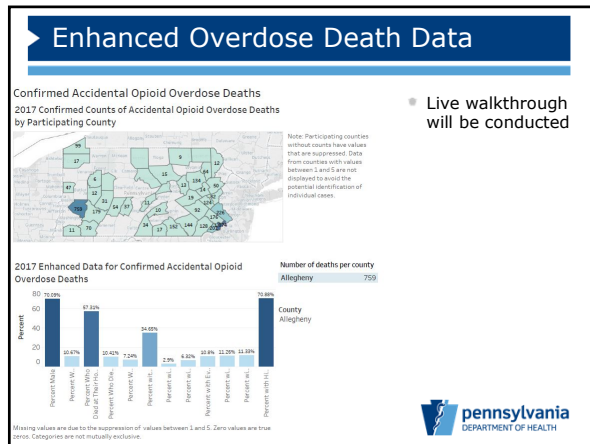

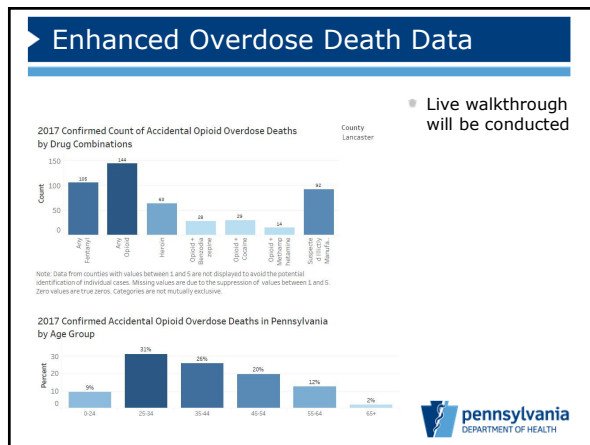

Death Data Collection Comparison

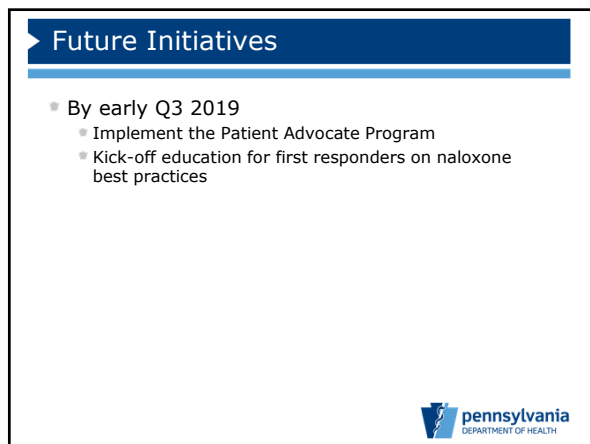

DEA Report	Coroner's Association Report	OverdoseFree PA Data Collection	DOH Data Collection (CDC funding)
Demographics	Demographics	Demographics	Demographics
Toxicology	Toxicology	Toxicology	Toxicology
			Death Certificate Data
			Additional Risk Factor Data:
			• Presence of bystanders who could theoretically administer naloxone
			• Prior rehab visits
			• Type of overdose (due to substance abuse, overmedication, etc.)
			• Route of administration (injecting, snorting, ingesting, etc.)
			• History of mental health or substance use issues
			• Naloxone administration, including who administered and how much
			• Evidence of rapid overdose
			• Scene evidence
			• Adding high-level PDMP data
